Velaga Vera Venkata Lakshman

Motivated computer science graduate with strong problem-solving skills and hands-on experience in programming languages including Java, Python, C, and C++. Completed a notable project on land-water classification using deep learning and deployed a full-stack web application. Successfully optimized a core Java application during an internship, improving performance by 20 percent. Proficient in HTML, CSS, and API integration, with excellent communication skills in English, Telugu, and Hindi

Education

10th class at Ekashila Techno School, Warangal
APRIL 2018 — MAY 2019

12th Class at Aditya Junior College, Kakinada
MARCH 2020 — APRIL 2021

B.Tech(cse) at Aditya College of Engineering and Technology, Surampalem
OCTOBER 2021 — MAY 2025

Internships

PROBLEM-SOLVING AND JAVA INTERN at Technical Hub Pvt Ltd, Surampalem
MAY 2023 — JULY 2023

Problem-Solving Achievements:-

- Identified and resolved a performance bottleneck in a core Java application, resulting in a quantifiable improvement (e.g., reduced response time by 20%, increased throughput by 15%).
- Devised and implemented a novel algorithm (mention the algorithm if relevant, e.g., sorting algorithm) to optimize data processing, leading to a (measurable) efficiency gain (e.g., decreased processing time by 30%).
- Collaborated effectively with senior developers to diagnose and solve intricate technical challenges.Pen spark

Java Achievements:-

- Developed a reusable Java library/component that simplifies a common task and promotes code maintainability (mention the library name/functionality if applicable).

Details

Kakinada, 533003, India

Skills

- MySQL
- HTML & CSS
- Java
- Problem Solving Skills
- Python
- C
- Restful Api

Languages

- English
- Hindi
- Telugu

- Contributed to the development of a scalable Java application that meets performance and reliability requirements.

Projects

Land-water Classification From Satellite Images, Kakinada

JANUARY 2025 – APRIL 2025

Technologies: Python, Mask R-CNN, Flask, HTML, CSS, SQL, Open CV, TensorFlow.

- Developed a complete full-stack deep learning web app to classify land and water in satellite images using Mask R-CNN.
- Implemented Flask back-end for model inference and database management; designed the front-end in HTML/CSS for image upload and result display.
- Integrated SQL for storing classification history and image metadata.
- Enhanced model performance and reduced processing time by 30% using advanced reprocessing and optimized model integration.
- Achieved 92% accuracy through hyper parameter tuning and extensive dataset validation.
- Delivered a real-time interface for seamless interaction and visual output rendering.

Certificates

Cyber Security, Kakinada

MAY 2024 – JULY 2024

SkillDzire

Certificate ID:- SDST-15814

IT Specialist In Java, Surampalem

FEBRUARY 2023 – JUNE 2023

Technical Hub Pvt Ltd

Certificate ID:-QPcq-4wbR

Machine Learning with Python: A Practical Introduction, Kakinada

MARCH 2024 – APRIL 2024

IBM

Certificate ID:-787b064ba00c44b8adb00cf86a04f9a7
